Last Updated: Jan 5, 2026

FRDM-MCXA174 is a compact and scalable development board for rapid prototyping of MCX A173 and A174 microcontroller units (MCUs). They offer industry standard headers for easy access to the MCU's I/Os, integrated open-standard serial interfaces, external flash memory and an on-board MCU-Link debugger. Additional tools like our Expansion Board Hub (EBH) for add-on boards and the Application Code Hub (ACH) for software examples are available through the MCUXpresso Developer Experience.
