

# NI IIVIIVIA9551LEVM Quick Start Guide

## 1 Unpack the Kit

- Unpack the board. Verify package contents according to the kit website: [freescale.com/sensortoolbox](http://freescale.com/sensortoolbox).
- Assemble the hardware by connecting the development board to the USB interface board. Both of these board types have a small arrow to indicate where to connect. See the image below. More information can be found at [freescale.com/sensingplatform](http://freescale.com/sensingplatform) or [freescale.com/sensortoolbox](http://freescale.com/sensortoolbox).

## 2 Download Latest Software

- At [freescale.com/sensortoolbox](http://freescale.com/sensortoolbox) download the latest software version.
- This kit uses the Sensor Toolbox software. Follow the on-screen instructions to install the communication driver for the tool. Check back occasionally for software updates.

## 3 Turn It On

- Plug in the USB and turn the board on using the power switch.
- Run the Sensor Toolbox link on your desktop.
- Explore other sensor kits at [freescale.com/sensortoolbox](http://freescale.com/sensortoolbox).
