

Automation Applications By Using mmWave with AI DVS, Thermal Image, RGB and Voice Processing Sensors

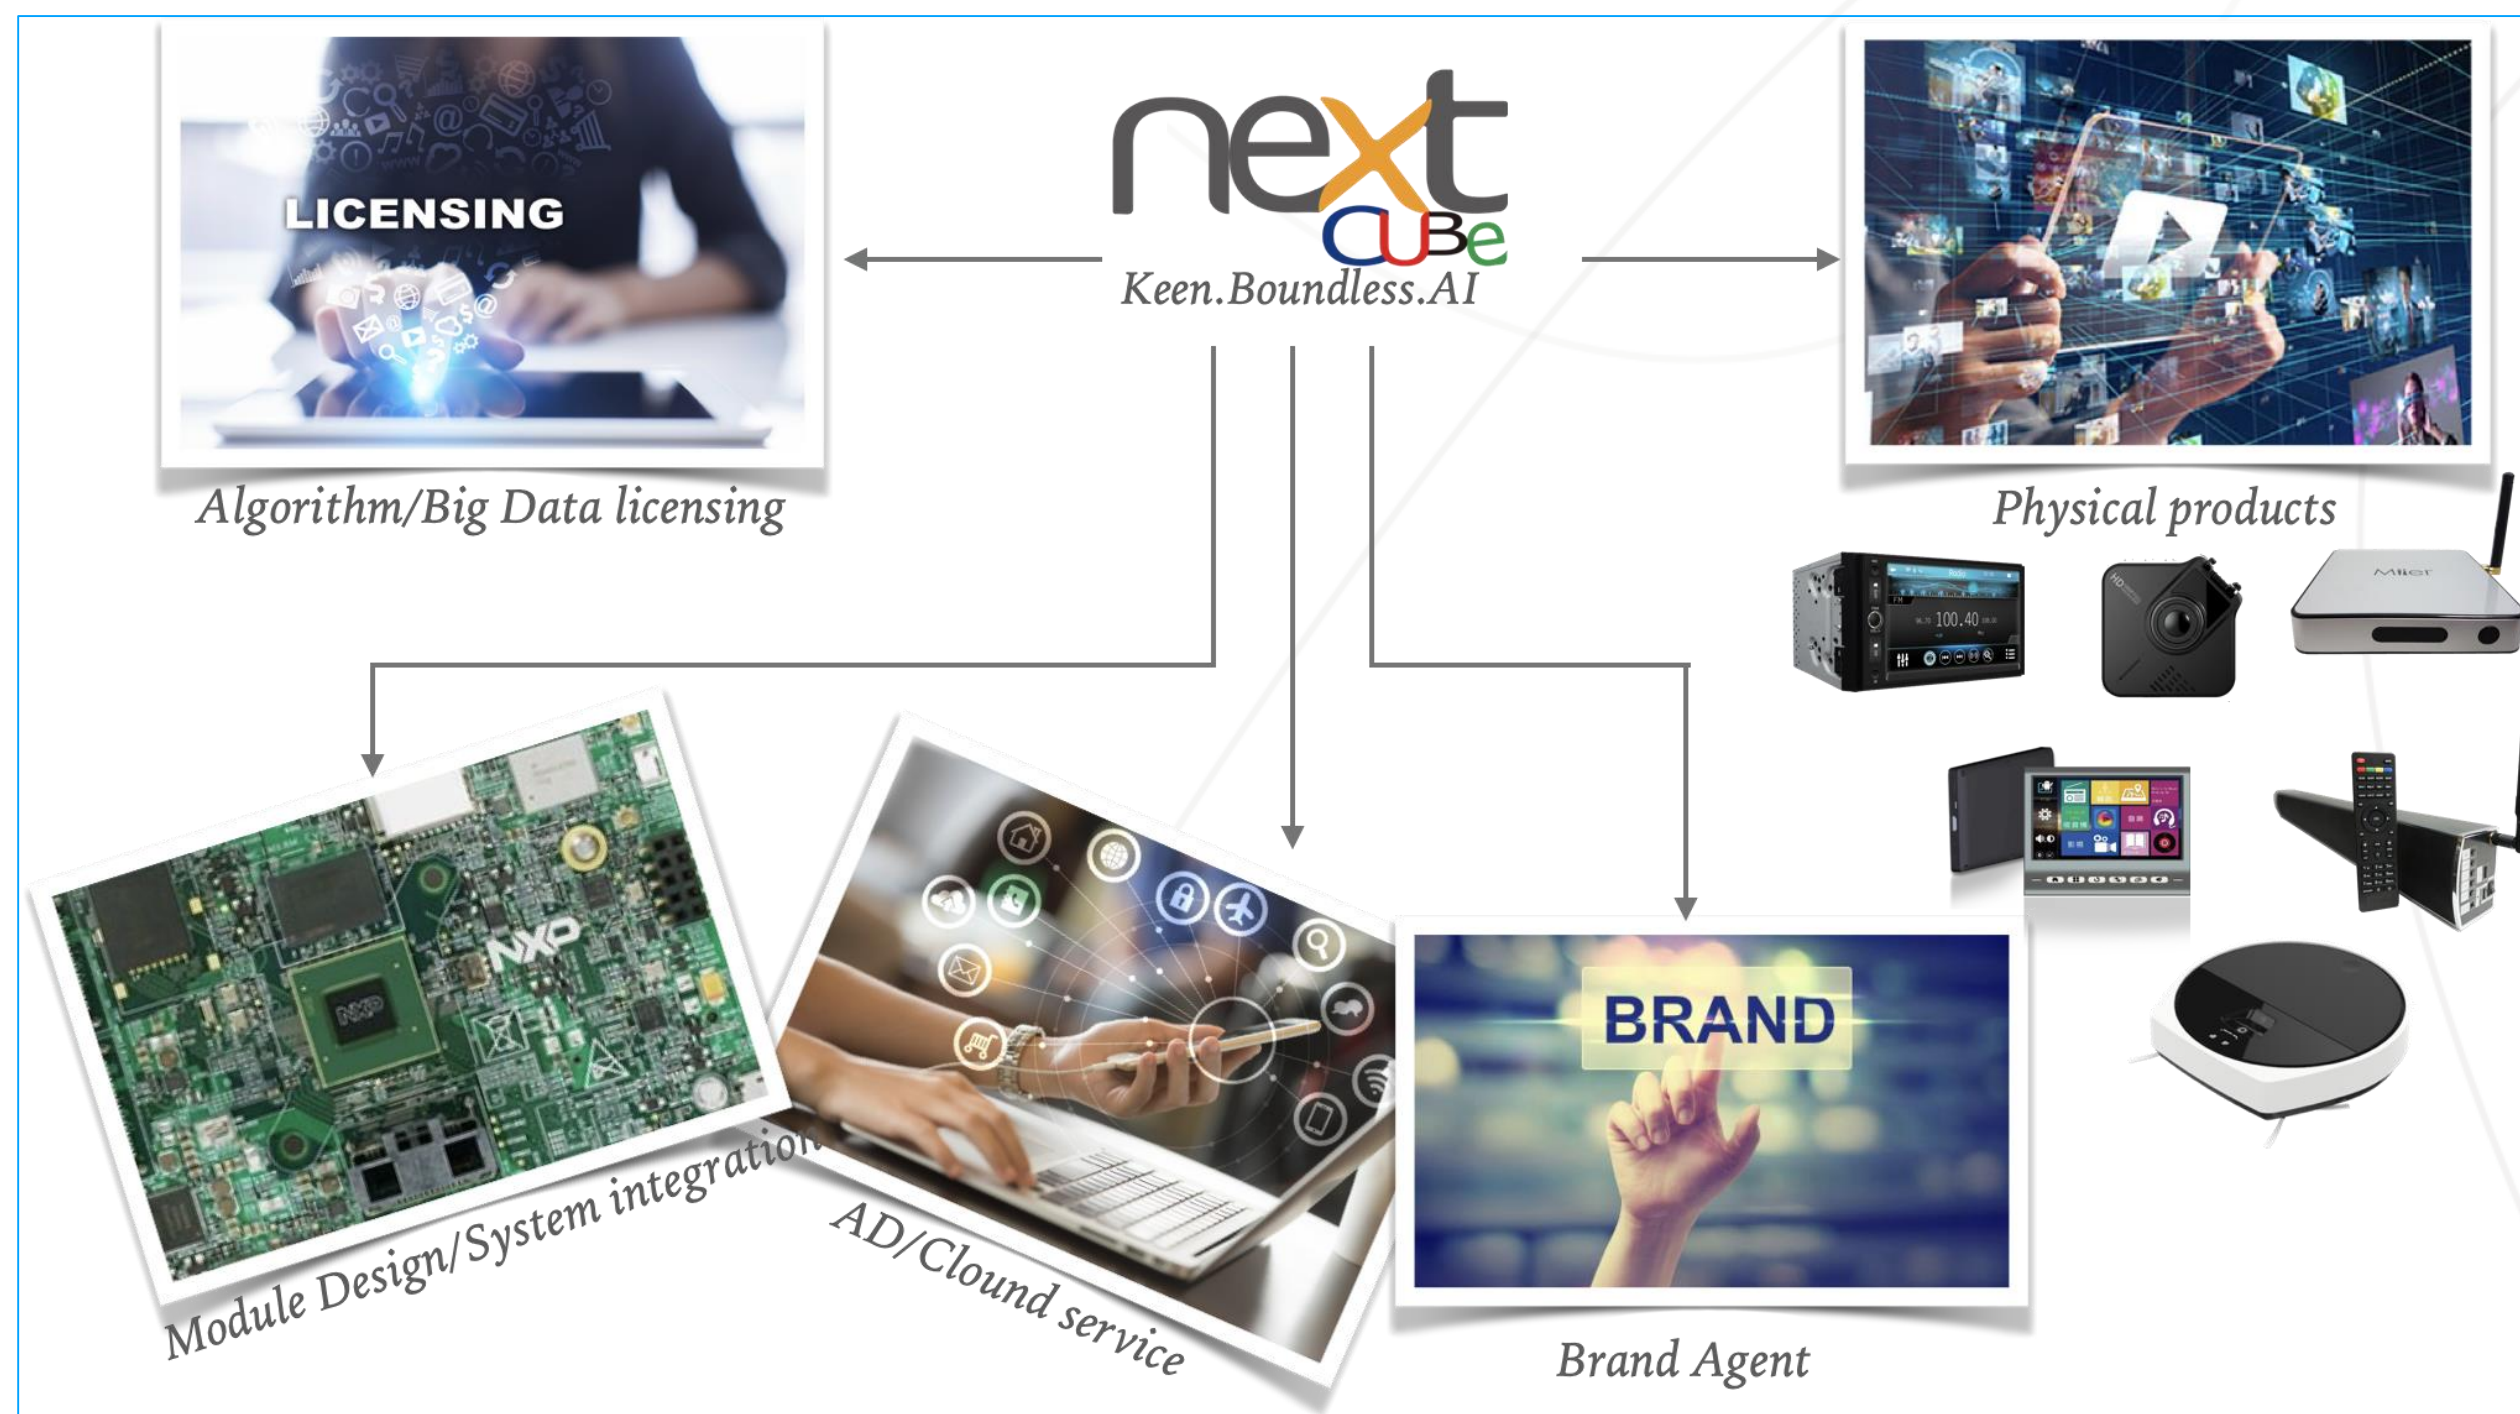

Rick Chiang

Product Manager at Nextcube Corporation

Rick.Chiang@next-cube.com

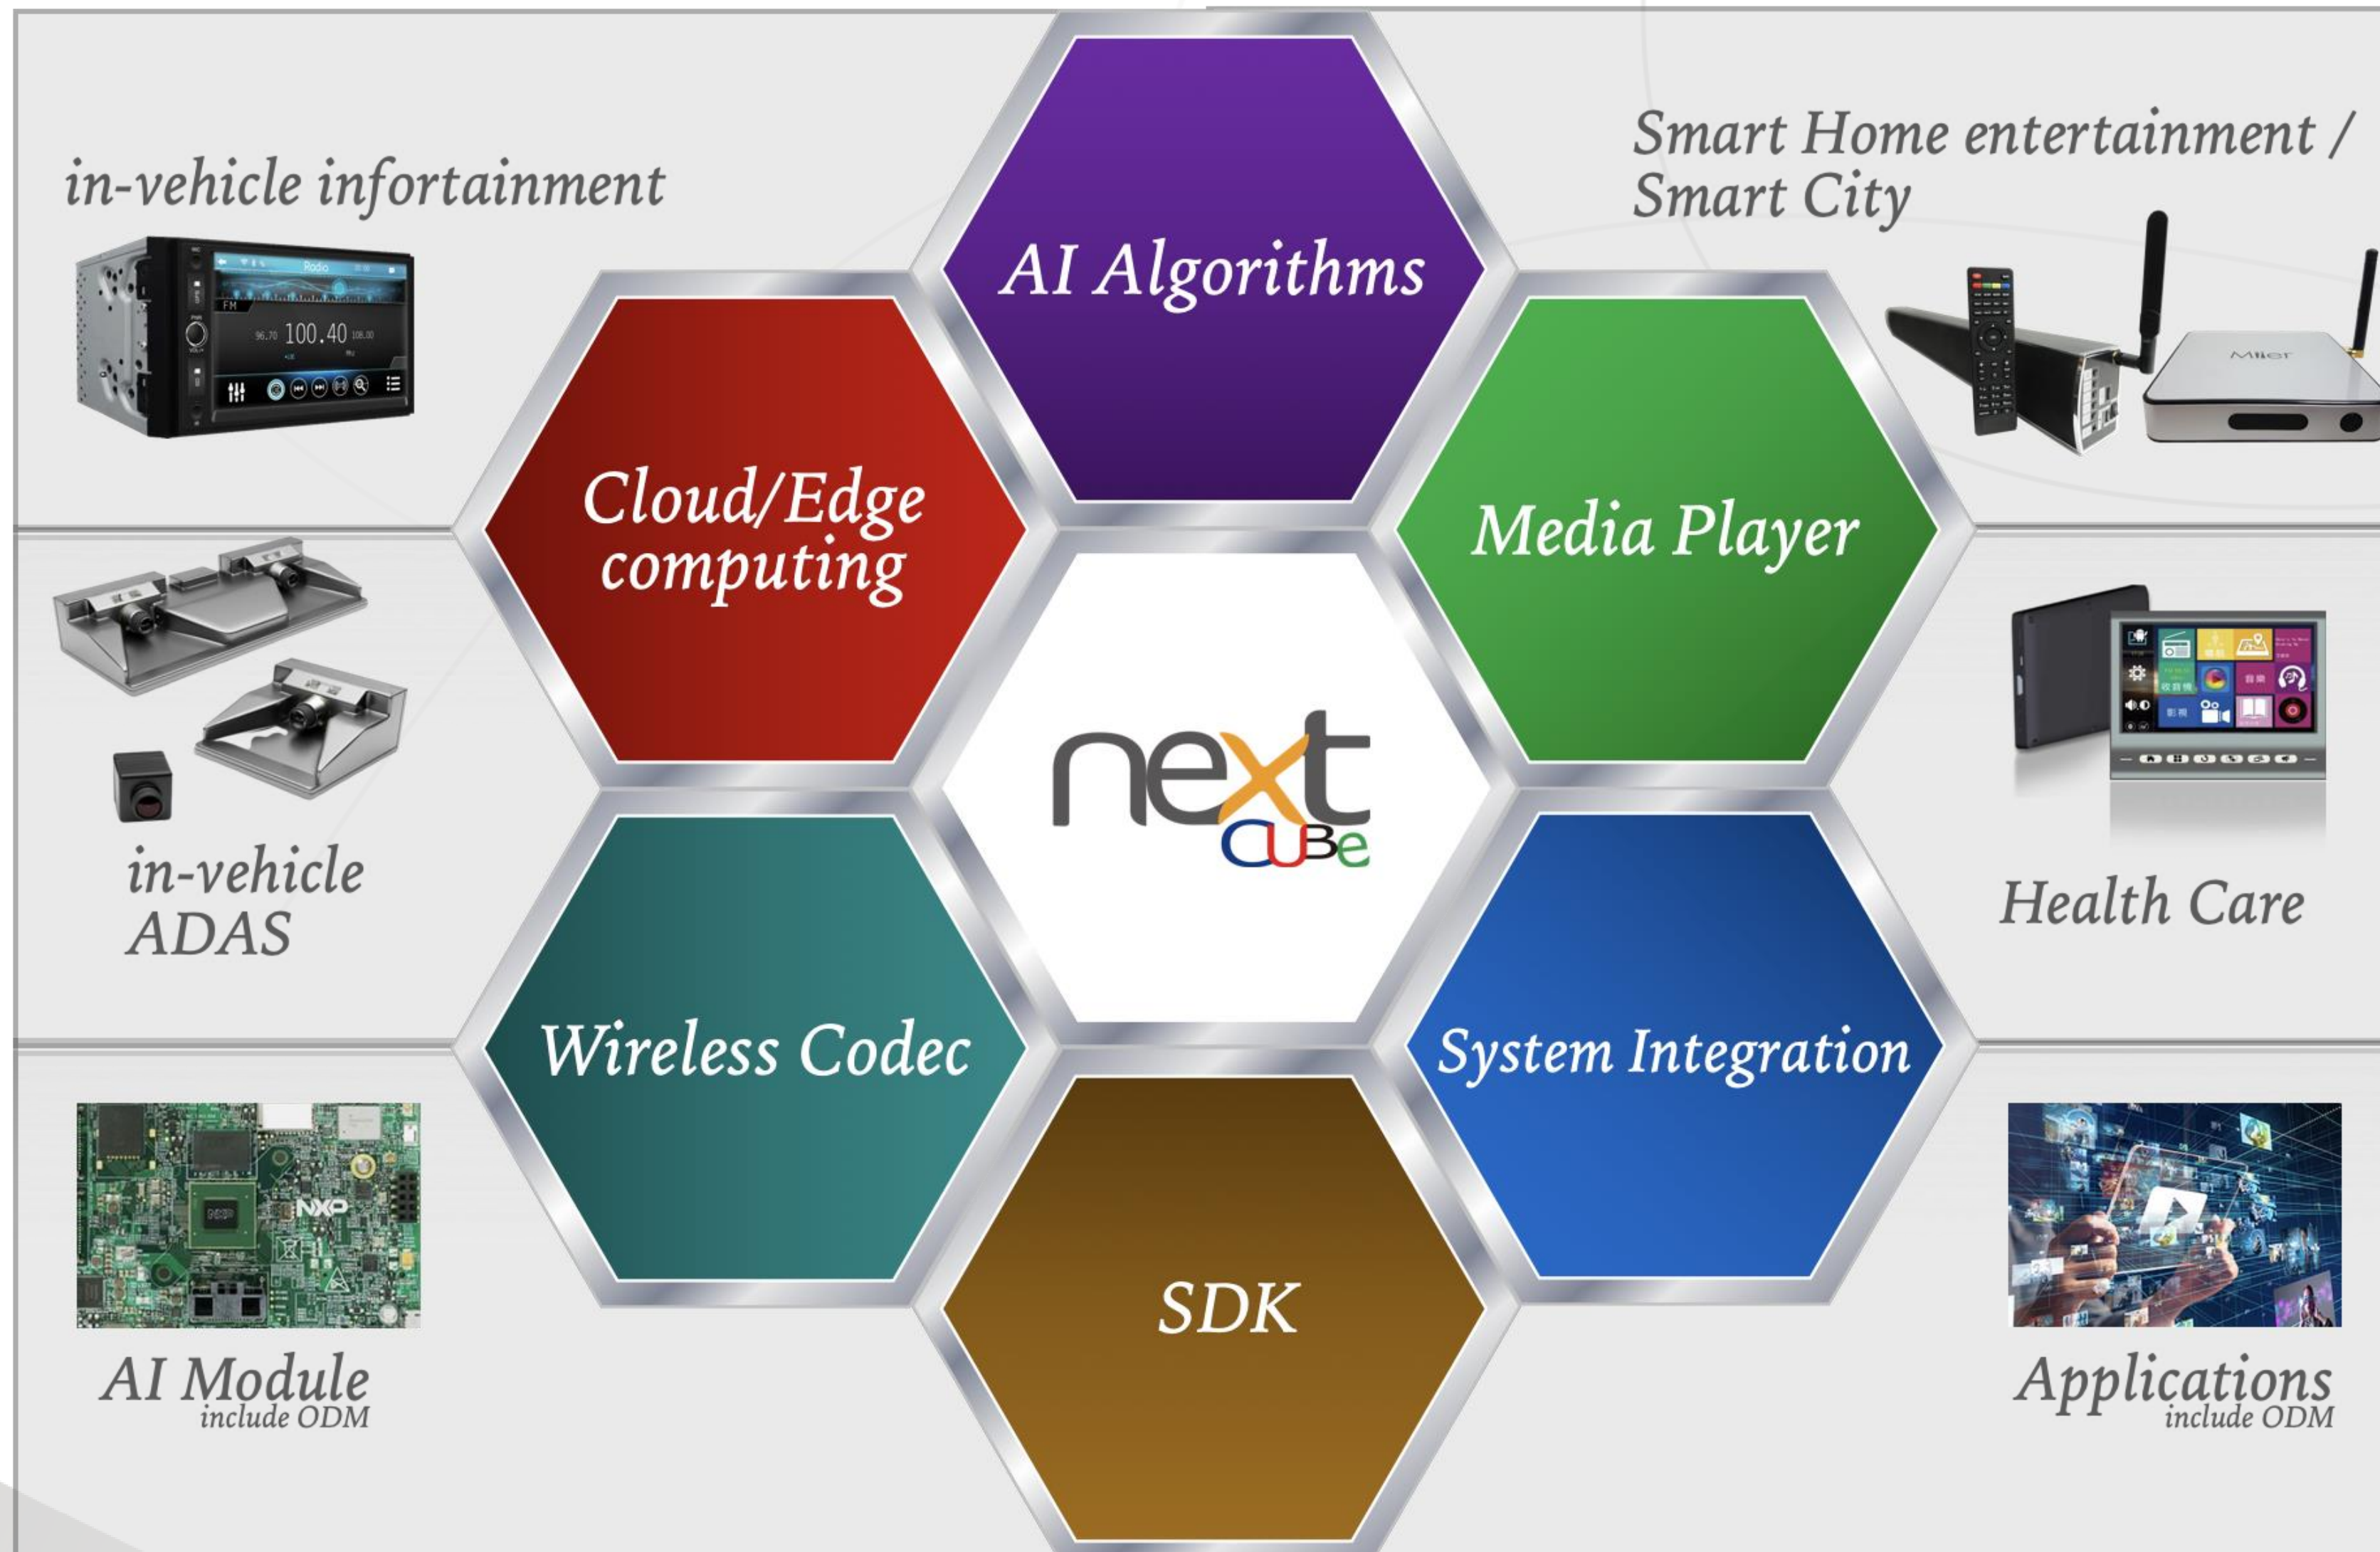

About Next-Cube

AI expert of multimedia

- ◆ We devote resource in R&D engineering and design electronic devices of health care, industry, vehicle, smart home/city, etc.
- ◆ 25 AI exclusive international patents. (does not contain the current application).
- ◆ More than 90% of R&D staff has a master's degree or doctorate.
- ◆ ODM / OBM / OEM capability and solution provider.
- ◆ Provide SDK solution.

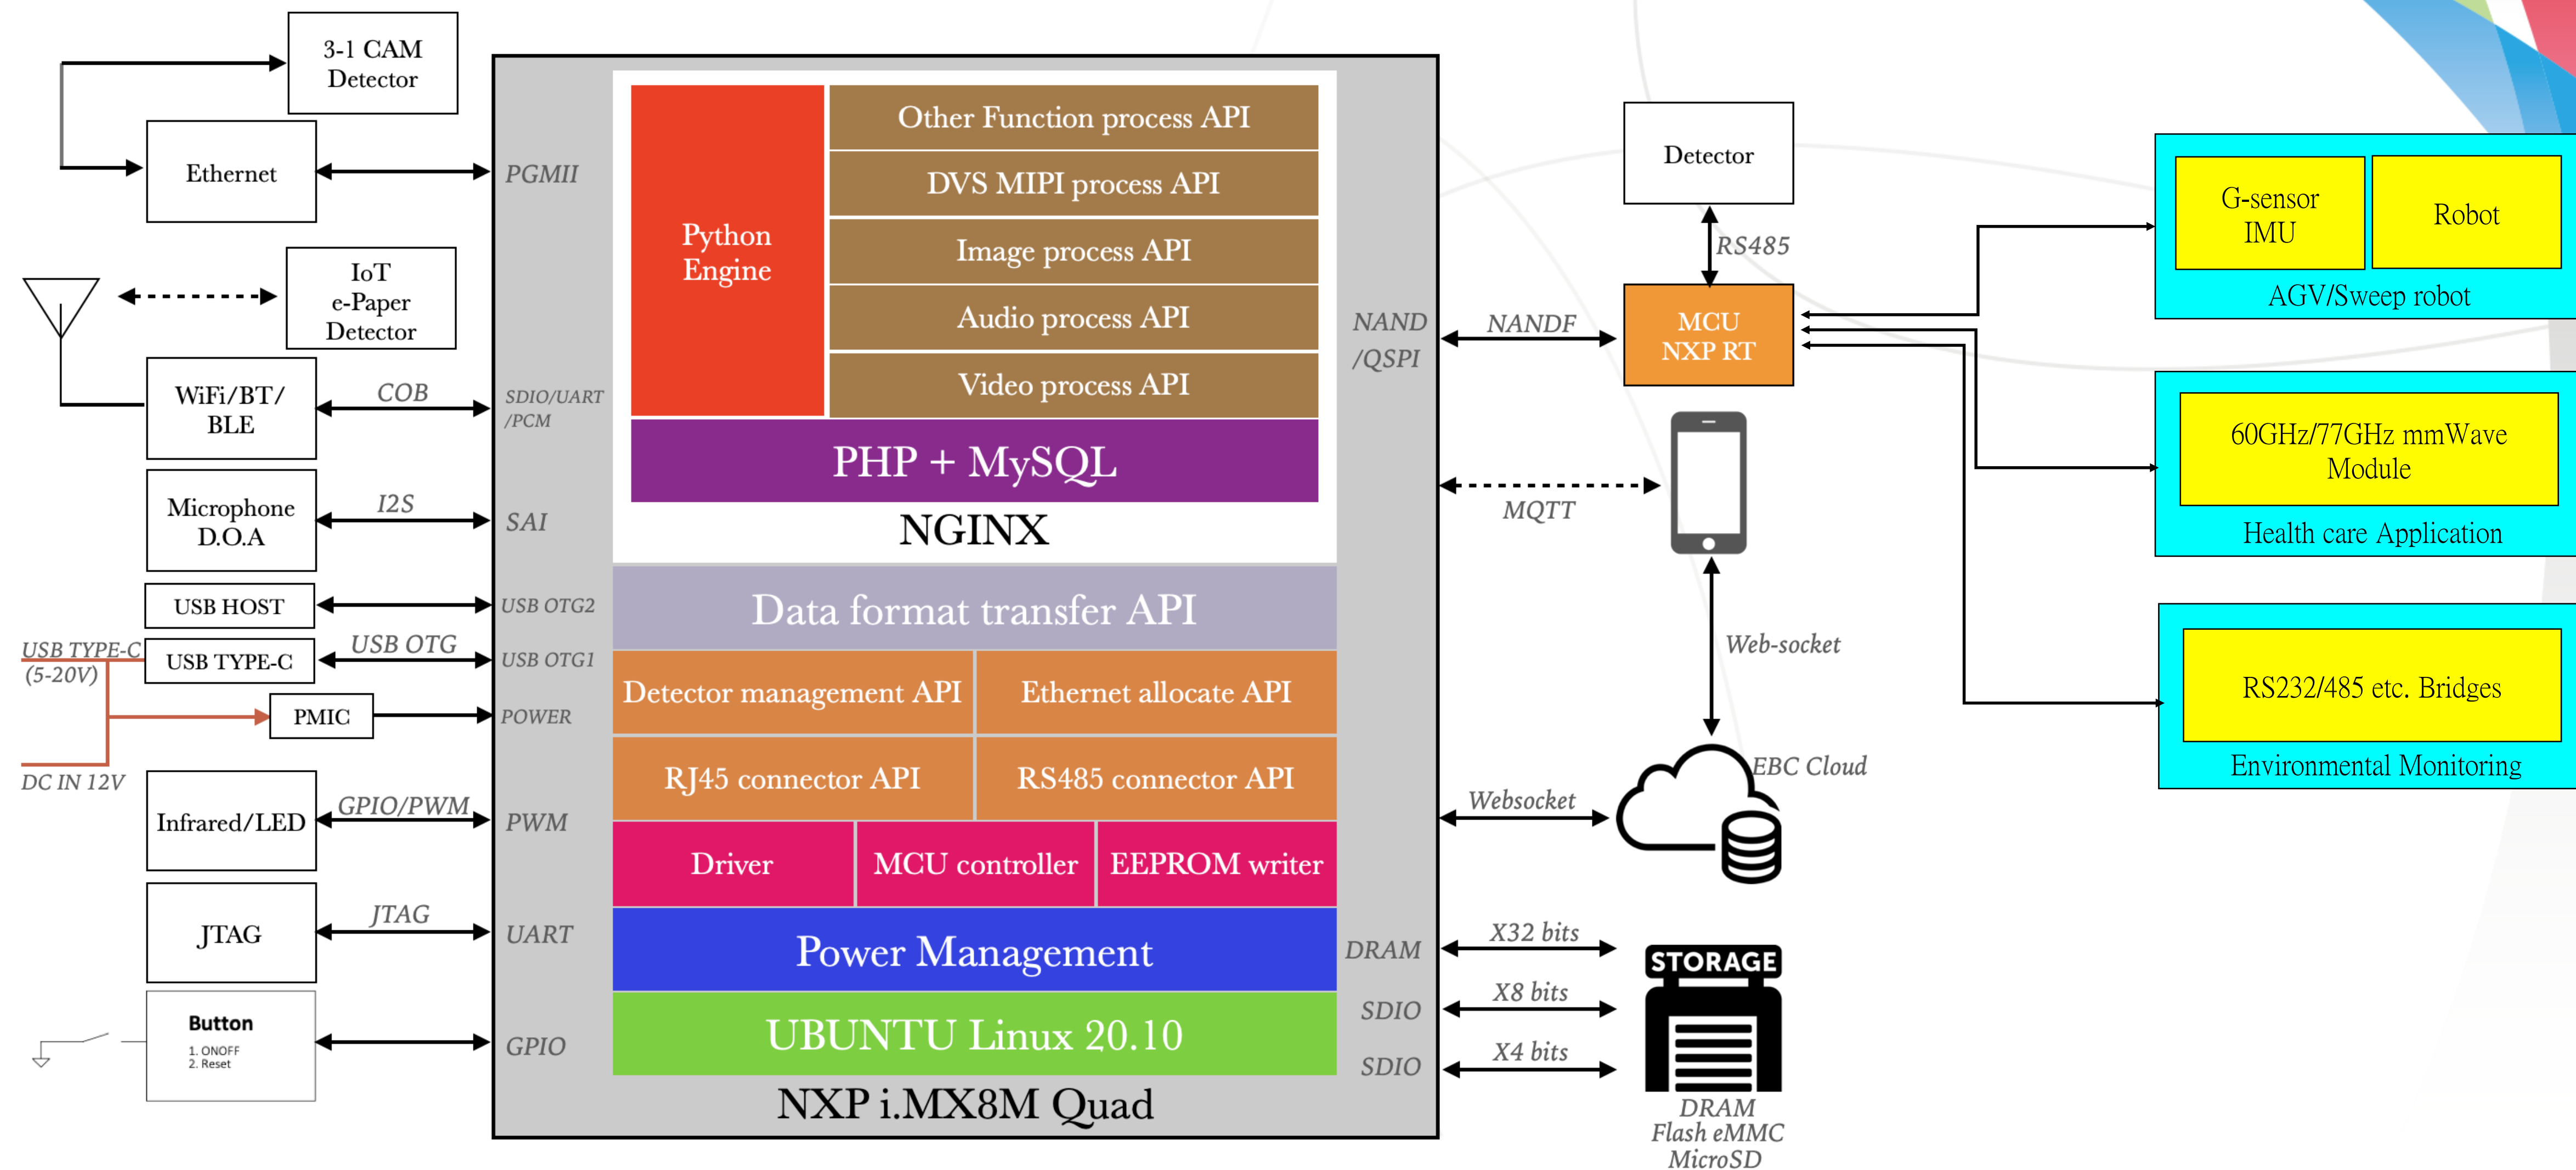

AI Product & Solution Introduction

NXP Platform

NXP series product common architecture

The best solution of edge computing

Intelligence Home Appliance

Sweep Vacuum Robot / Multi-Vision Camera

Common Main features:

- ◆ Up to 4 lenses can be interchangeable(DVS, RGB, Thermal).
- ◆ Privacy protection with DVS lens.
- ◆ Feature recognition and identification / Object distance calculation / 3D mapping.
- ◆ Voice / Gesture remote control & Setting without APP.
- ◆ Health care, like falldown / cough and Hard Breath detection, etc.
- ◆ Active safety protection
 - Distress signal detection.(Sound, Gesture)
 - Danger behavior prediction.(Domestic violence, through the cordon, etc.)
 - Vision intrusion detection.
 - Abnormal noise detection.
 - sitter-in
- ◆ D.O.A
- ◆ AIoT

● NXP i.MX 8M Quad CPU	● Multi-vision interchangeable lens
● Advantech 2.9" e-paper	● 4 way microphone array
● Advantech EWM-W306	

In-vehicle Application

ADAS / ADB

- ◆ Complex scene recognition
- ◆ Driver/Passenger behavior analysis
- ◆ Temperature measurement

The camera scans more than 15 times /S

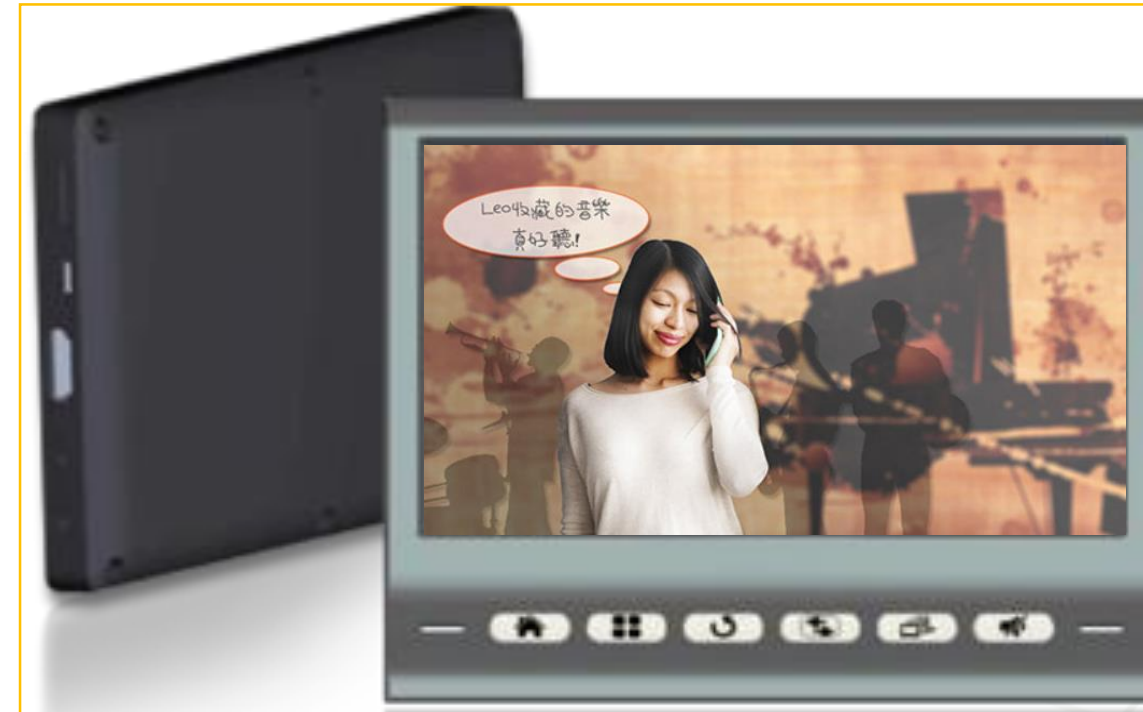

Judgment distance: each other's incoming car > 300 meters; the front vehicle > 200 meters; (According to the actual speed and road conditions, adjust the detection distance)

● NXP i.MX 8M mini CPU	● Multi-vision interchangeable lens
● NXP RT	● 4 way microphone array

Consumer electronics Applications

AIoT Environment controller / OTT / SoundBar

● NXP i.MX 8M Quad CPU	● Multi-vision interchangeable lens
● NXP RT	● 4 way microphone array
● Advantech EWM-W306	
● Suitable for Mult-Vision Camera	

Common Main features:

- ◆ Feature recognition and identification / Object distance calculation / 3D mapping. **
- ◆ Voice / Gesture** remote control & Setting without APP.
- ◆ Health care, like falldown ** / cough and Hard Breath detection, etc.
- ◆ Active safety protection
 - Distress signal detection.(Sound, Gesture **)
 - Danger behavior prediction.(Domestic violence, through the cordon, etc.) **
 - Vision intrusion detection. **
 - Abnormal noise detection.
- ◆ D.O.A
- ◆ Environment status delectation & AIoT

****Must be paired with the camera**

New Automation Application – Automotive/Smart Traffic

Traffic Management

traffic flow solution

parking violation & restricted area solutions

traffic violation solution

Wrong way detection with number plate recognition

Truck, motorbike & pedestrian violations

Queuing detection for traffic management

Vital Sign Detection

AI For DVS Lens Performance Demo

The Best Choice In-vehicle L4 & L5 Autopilot

Main Features

- ◆ Event-base Vision Sensors.
- ◆ High-speed/ Low-latency Response.
- ◆ Wide Dynamic Range Operation.
- ◆ Low Power Consumption

Applications

- ◆ Machine Vision
- ◆ Industrial Automation
- ◆ Advance Driver Assistance Systems(ADAS)
- ◆ Robotics, Motion Analysis And Monitoring
- ◆ Security and Surveillance Cameras
- ◆ Battery-powered IoT Cameras

Automotive/DVS Object Detection

Object Identification

Health Care / Falldown

Behavior Detection

AI For RGB Lens Performance Demo

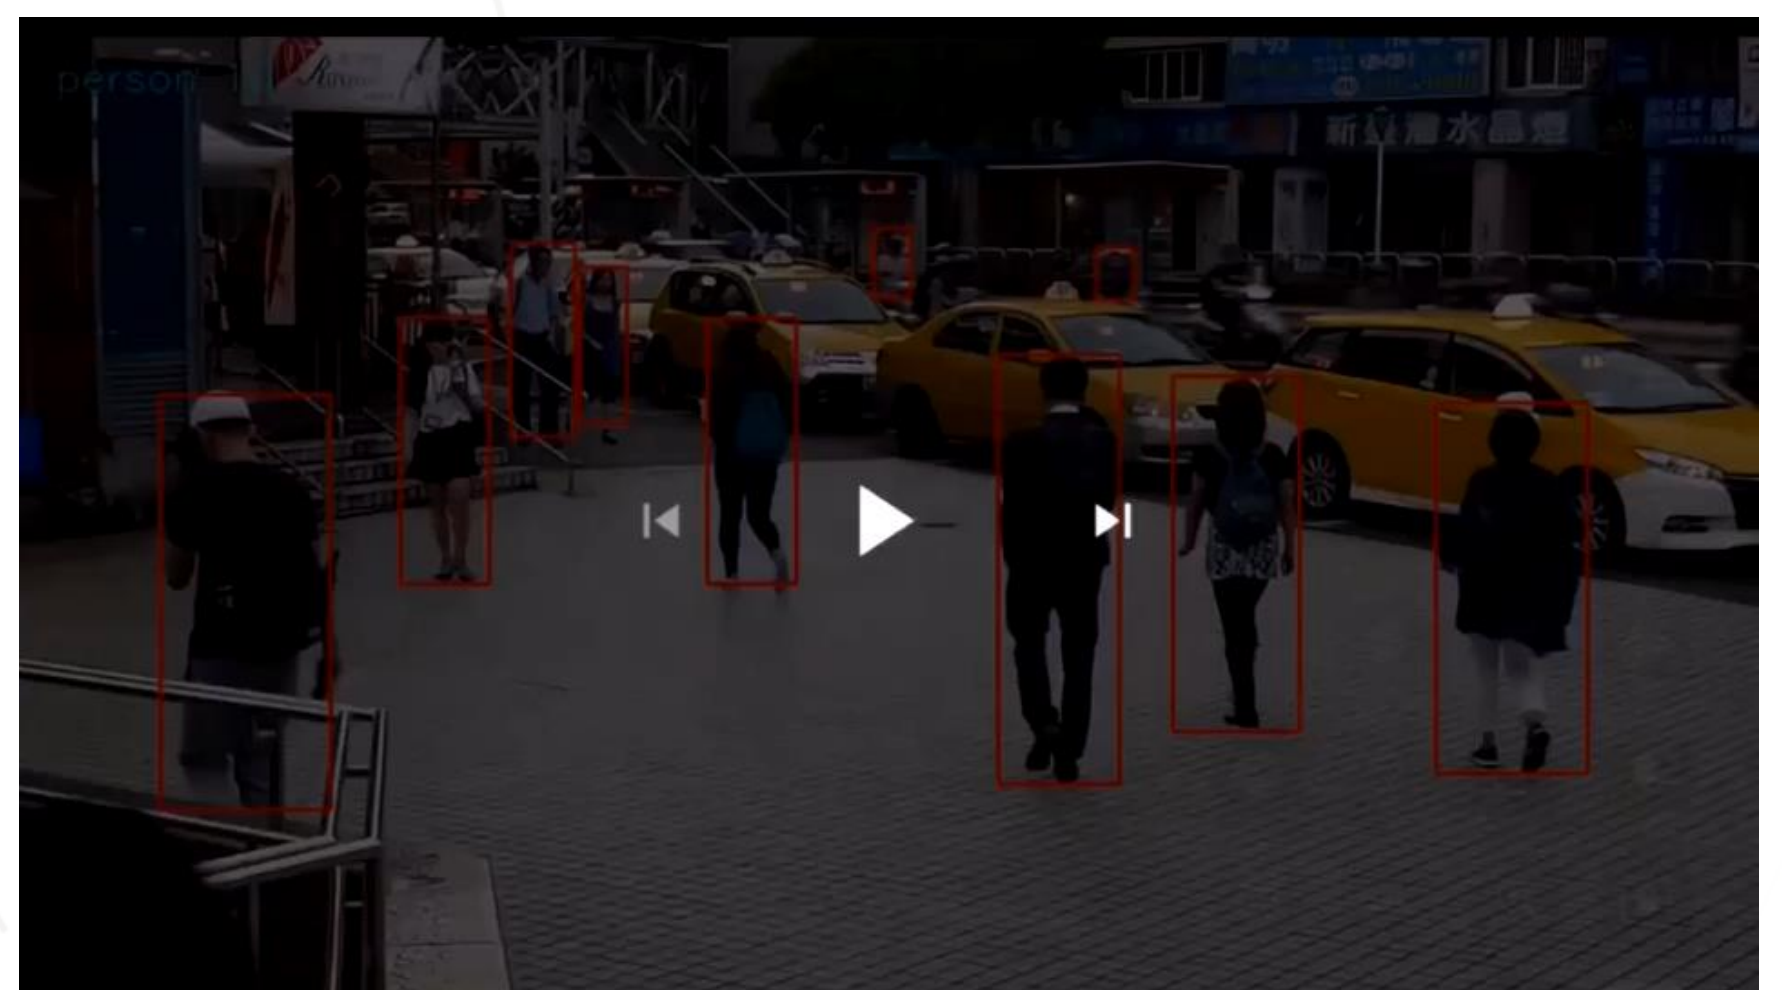

Driver Drowsiness Detection

Human Detection with car motion

Object Detection & Identification

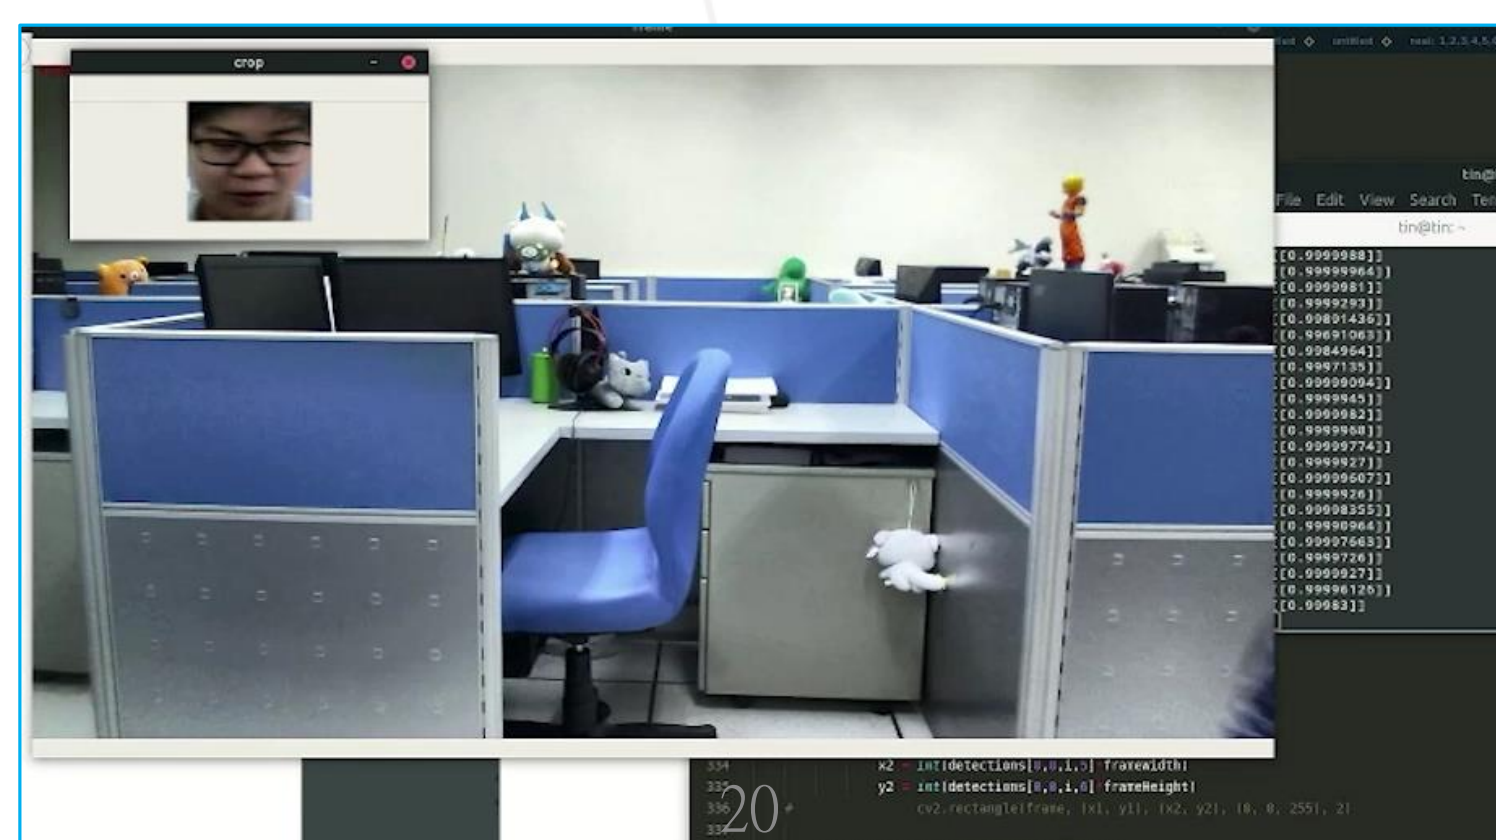

Pedestrian Detection

AI For RGB Lens Performance Demo

Age/Gender/Emotion Detection

Face & Anti-Fake Recognition

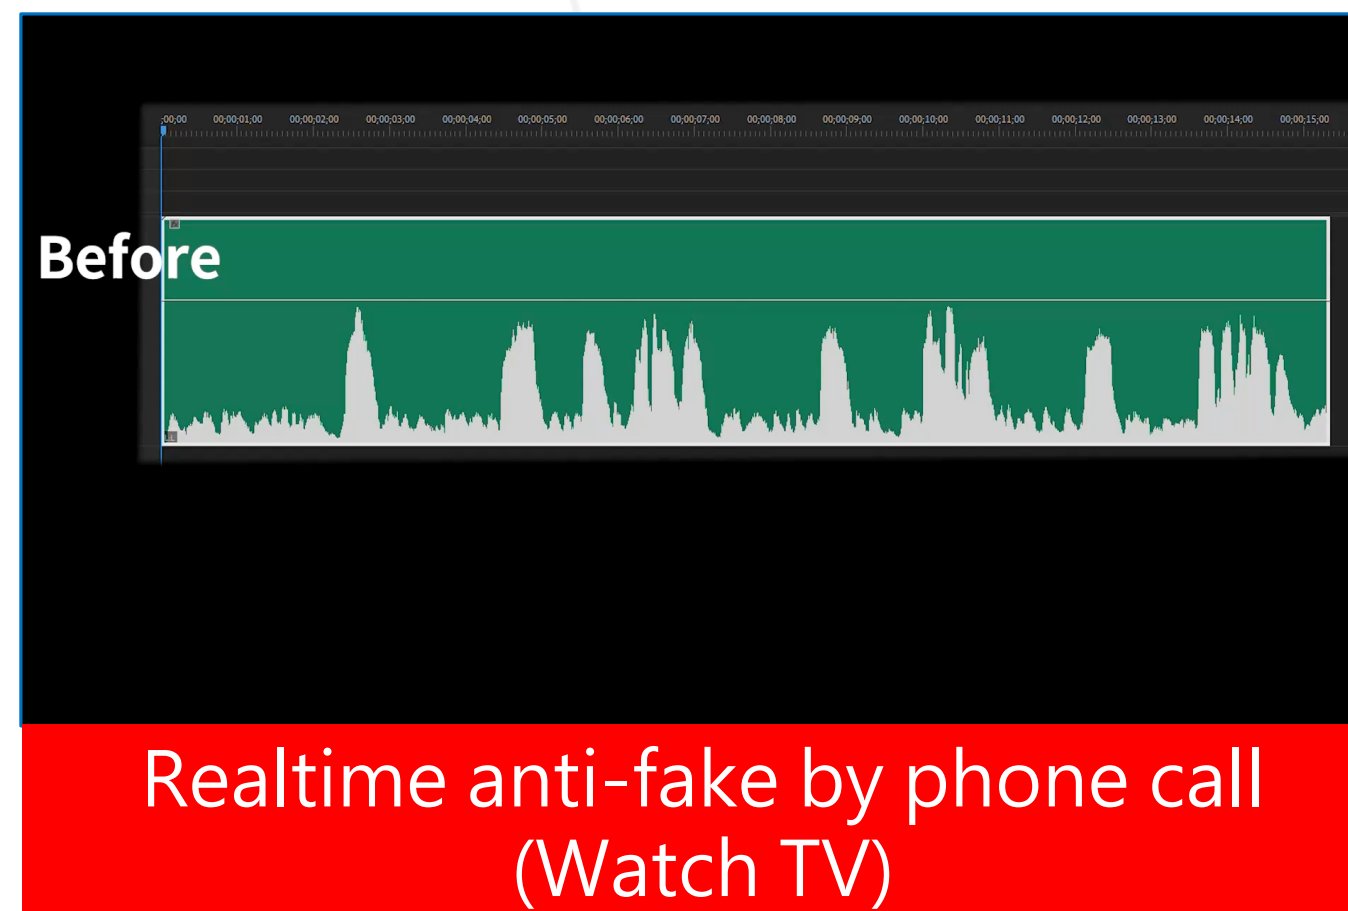

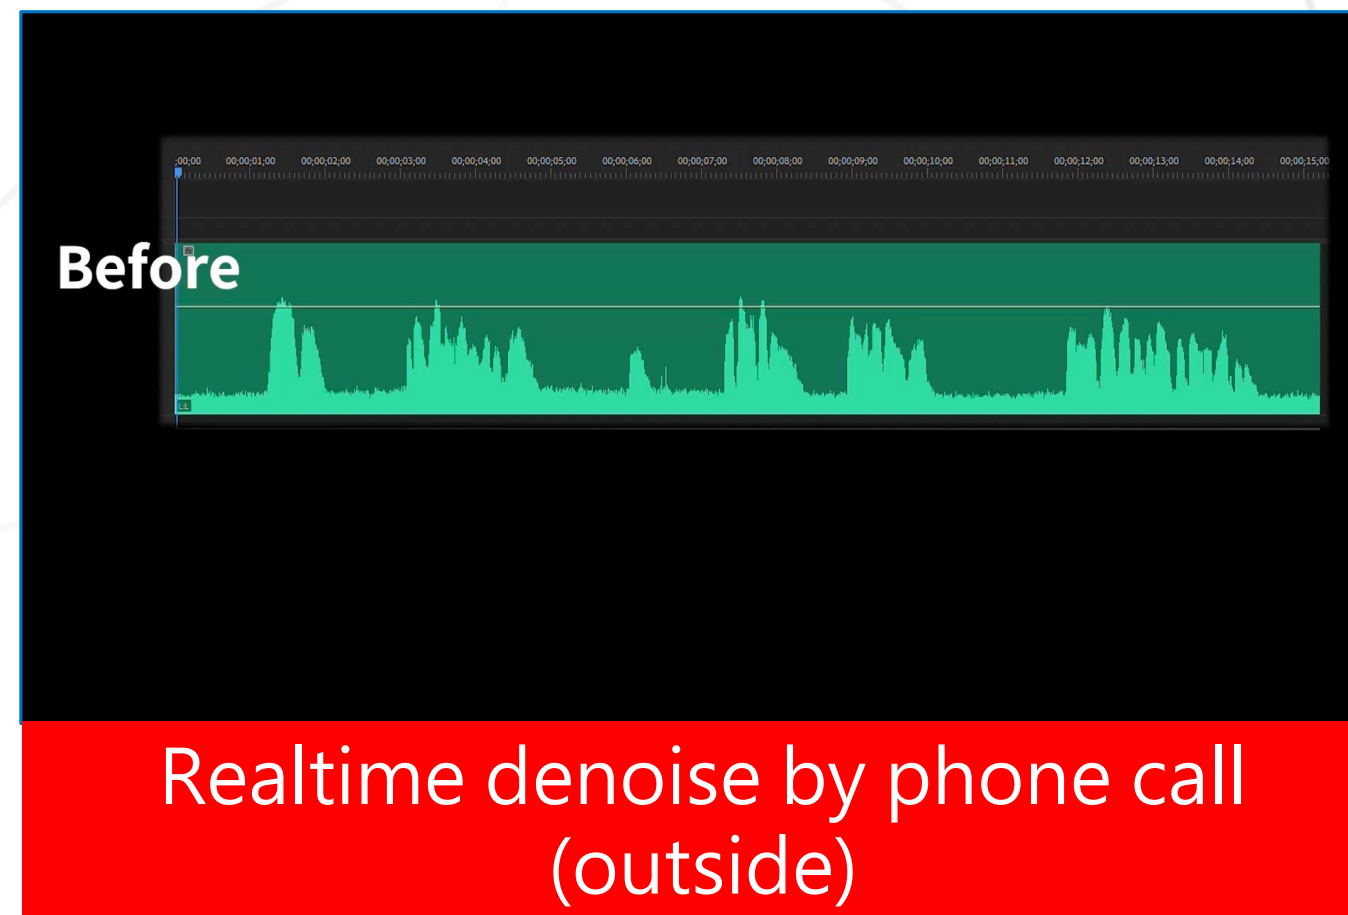

Multi-mode Gesture Detection

AI for Realtime denoise and feature separation demo

Diff. environment phone call denoise / music separation to vocal and accompaniment

- ◆ It can be adjusted manually/automatically in...
 - Echo
 - Equalizer
 - Volume
- ◆ Algorithm can be build in SoC.
- ◆ Denoise can identify the source of the sound, and anti-fake in advance.
- ◆ music separation can
 - automatically adjust the pitch.
 - Singing score.
 - etc.

AI for Health care and advanced sound processing demo

Cough and Hard Breath detection / Sound emotion and Speaker recognition / ASR and auto-translation / D.O.A

- ◆ Algorithm can be build in SoC.
- ◆ It can automatically detect the frequency and classification of cough and Hard Breath.
- ◆ 5 sound emotion can be identification.
- ◆ Recognize 6 different sounds, baby/fire alarm/sickroom alarm/knock/dog/broken glass.
- ◆ TaiYu also can be recognized.
- ◆ Speaker recognition / ASR / Auto-translation

Cough Detection
